

Dear FCC,
Please reject the National Association of Broadcasters's petition 04-160.
Satellite radio provides services not otherwise available on the air waves. I
pay for these services and believe it should be my right to continue to receive
all these services, including the Instant Traffic and Weather stations. I
travel up and down the east coast of the US and find the ability to learn
traffic and weather conditions in advance of arriving in the actual metropolitan
areas very helpful. Local AM or FM stations cannot substitute for this
capabilty. I am disturbed that the NAB wishes to stifle competition in
violation of the freedom's guaranteed under our Constitution.

Thank you for your consideration of my views.

Sincerely,
James Urquhart
